Sai Meghana Annepu

annepu.saimeghana@gmail.com Sai Meghana Annepu Maggiee18 Amaravati, India

Professional Summary

Computer Science undergraduate specializing in AI/ML with hands-on experience building AI-enabled and full-stack applications using Python, Java, C++, SQL, React, APIs, databases, and cloud-ready development practices. Experienced in machine learning, computer vision, RAG, LLM applications, AI agents, GraphRAG, testing, and backend engineering. Strong foundation in Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, and Software Engineering, with a focus on building reliable, testable solutions for real-world problems.

Technical Skills

Programming: Python, Java, C++, C, SQL, JavaScript, TypeScript
AI/ML: Machine Learning, Deep Learning, Computer Vision, PyTorch, Scikit-learn, YOLOv8, OpenCV, Pandas, NumPy
AI & LLMs: Generative AI, LLMs, RAG, Embeddings, AI Agents, GraphRAG, Prompt Engineering, LLM Evaluation, Gemini API
Software Development: React.js, Next.js, FastAPI, Flask, Node.js, Express.js, REST APIs, WebSockets, HTML/CSS, Tailwind CSS
Databases: SQL, PostgreSQL, pgvector, MongoDB, Firebase
Engineering: Git, GitHub, Docker, Postman, API Testing, CI/CD Concepts, Debugging, Testing, Validation
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Education

SRM University AP Aug 2023 – May 2027
B.Tech in Computer Science and Engineering, Amaravati, Andhra Pradesh **CGPA: 8.57/10**

Mahodaya Junior College 2022
Intermediate / Class XII, Visakhapatnam **Percentage: 89.9%**

Bhashyam High School 2020
Class X, Visakhapatnam **Percentage: 99.67%**

Experience

Salesforce Intern, SmartBridge May 2025 – Jul 2025

- Translated functional requirements into application logic, CRM workflows, validation rules, and automated business processes.
- Developed and configured custom objects and workflow automation while applying structured debugging and validation practices.
- Performed application testing, troubleshooting, and deployment validation to improve reliability and maintainability of solutions.

Projects

Agentic Fraud Investigation – AI Risk Analysis GitHub
Python, LangGraph, TigerGraph, GraphRAG, Gemini/Anthropic, Pydantic, Streamlit

- Built an AI-driven fraud investigation system that analyzes transaction, device, identity, and historical case evidence using a TigerGraph knowledge graph.
- Implemented LangGraph agent orchestration, GraphRAG retrieval, uncertainty assessment, case-memory retrieval, and evidence synthesis.
- Separated LLM reasoning from deterministic fraud detection and policy decisions to improve auditability, validation, and reliability.

Lenny Growth Assistant – RAG AI Application GitHub
Next.js, React, TypeScript, FastAPI, Python, PostgreSQL, pgvector, RAG, Embeddings, Ollama, Anthropic, Docker

- Built a full-stack RAG application over podcast transcripts, generating grounded responses with cited sources and structured artifacts.
- Implemented FastAPI services, PostgreSQL/pgvector similarity search, embeddings, deterministic agent routing, LLM provider abstraction, and document ingestion pipelines.
- Added automated evaluation, structured testing, input/output validation, artifact sanitization, Docker deployment, and 83 backend tests.

Crowd Risk Analysis – Computer Vision & ML GitHub
Python, YOLOv8, PyTorch, Scikit-learn, FastAPI, WebSockets, Docker

- Developed a real-time AI system combining computer vision, machine learning, backend APIs, WebSockets, and monitoring for crowd-risk prediction and anomaly detection.
- Implemented YOLOv8 detection, multi-object tracking, optical-flow analysis, Random Forest/SVM prediction, anomaly detection, and LSTM-based temporal forecasting.
- Integrated FastAPI, WebSockets, PostgreSQL, and Docker for an end-to-end real-time AI application.

Achievements & Certifications

- Oracle Certified Professional: Java SE 17 Developer (2026)
- MongoDB Associate Developer (2026)
- Amazon Future Engineer Scholar – Cohort 3 (Java)
